

Louisiana CDL verification

Record checklist and follow-up log | Federal requirements for covered commercial driving

Use this with the linked guide. A completed checklist does not certify qualification. Verify applicability, lawful access and unresolved discrepancies before assigning covered driving.

Check	Record and action
1. License and work	Compare current commercial privileges, class, endorsements and restrictions with the vehicle/job. Obtain the appropriate current motor vehicle record.
2. ELDT applicability	Document whether the license or endorsement required entry-level driver training. Do not infer fraud from a missing record without checking prior credentials and exceptions.
3. Training and testing	Check provider status. Have the driver check their own TPR completion record. Investigate discrepancies and document the employer road-test basis or permitted equivalent.
4. Medical record	For covered Louisiana CDL holders, confirm the required electronic medical status/CDLIS MVR. The nationwide paper-certificate exemption ended October 11, 2026; Alaska received a separate renewal.
5. Clearinghouse	Use authorized employer access and required consent. Complete the pre-employment full query and applicable annual query; follow any prohibition or follow-up requirement.
6. Employer file	Document prior-employer inquiries, MVR requests, annual review, applicable qualification documents and retention. A pending request is not a verified result.

Official starting points
